- **ACCESSIBILITY**
Administrators can access prescriber profiles for review.
- **TRAINING AND EDUCATION**
Review prescriber reports as part of patient care and prescriber training.

Organizational Management: Helping your prescribers provide better patient care.

The Maine Organizational Management module allows chief medical officers, medical directors, and other medical supervisors in a hospital, FQHC or private practice to view and monitor their current practicing prescribers' prescribing history within the Maine PMP AWARe platform.

- Supervisors will be able to review the prescribing histories and habits of prescribers in their organization as a tool to facilitate reviews of patient care and training. It will also assist supervisors to ensure prescribers and their delegates are utilizing the PMP properly.
- The administrator(s) will first create their organization and then will be able to invite the prescribers in their organization as basic users.
- Each invitee will need to accept membership in their organization's OM feature on their My Profile page.
- Each organization's OM administrators are responsible for adding new prescribers as they join a practice and for removing those no longer with the organization.
